Outstanding Cost Reduction Contribution

"JCI worked with us on the design, implementation, and later production of wire harnesses that have resulted in a 12% reduction in the cost of our electrical assemblies. Throughout the entire realization process JCI was very prompt and professional in its execution and has continued to be very responsive to any needs we have since production has begun. Overall the experience of working with JCI has been very pleasant and I will look to utilizing them as a resource for future projects."
